## Professional Summary

Aspiring Software Engineer and final-year B.Tech Artificial Intelligence & Data Science student with hands-on experience building scalable web applications using Next.js, React, Node.js, and PostgreSQL. Developed AI-powered projects including HireMind, an intelligent recruitment platform, and CodeSentry, an open-source Python CLI tool for validating AI-generated code security. Passionate about designing practical software solutions, learning emerging technologies, and building impactful applications.

## Education

**Panimalar Engineering College** – B.Tech in Artificial Intelligence & Data Science (CGPA: **8.75/10**) *2023 – 2027*  
**Excel Matriculation Higher Secondary School** – Class XII (HSC): **88.16%** *2023*

## Skills

**Languages & Frameworks:** JavaScript (ES6+), Python, Java, SQL, React.js, Next.js, Node.js, Express.js

**Cloud Platforms:** Oracle Cloud Infrastructure (OCI), Google Cloud Platform (Vertex AI)

**Deployment & Hosting:** Vercel, Render, Firebase

**DevOps & Tools:** Git, GitHub, Docker, Docker Compose, Postman

**Databases:** MongoDB, Mongoose, PostgreSQL (Neon)

**Core Concepts:** OOP, Data Structures & Algorithms — LeetCode (150+) — TakeUForward (200+)

## Professional Experience

**Zuntra Digital Private Limited**, AI & Automation Intern (Software Engineering) *Sep 2025 – Apr 2026*

- Designed and developed **HireMind**, an AI-powered recruitment platform using Next.js, Neon PostgreSQL, and modern full-stack technologies as part of the internship project.
- Built an LLM-powered candidate evaluation pipeline using Google Cloud Vertex AI (Gemini) and RAG to generate interview questions, analyze resumes, and improve candidate-job matching.
- Developed 20+ REST API endpoints for authentication, resume parsing, ATS scoring, interview management, and candidate evaluation workflows.
- Delivered 15+ core features across multiple Agile sprints, collaborating with mentors to refine functionality, optimize performance, and prepare the project for deployment.

## Projects

**SupportDesk — Multi-Tenant Support Ticketing Platform** GitHub

- Engineered a multi-tenant SaaS ticketing platform on the MERN stack with query-level data isolation, preventing cross-tenant data leaks.
- Built custom Express.js middleware for JWT authentication and RBAC, enforcing tenant verification across all API routes.
- Designed MongoDB/Mongoose schemas and a state-machine workflow engine enforcing valid ticket lifecycle transitions.

**Crack The Vault — LLM Security Game** GitHub

- Architected a 3-service microservice system (FastAPI (Python) API Gateway, Policy Engine, Node.js/Drizzle DB Service) orchestrated via Docker Compose, backed by Neon serverless PostgreSQL.
- Engineered a prompt-injection defense layer validating LLM inputs through regex-based filtering and rule-violation detection before evaluation.
- Deployed and playtested live across 60+ concurrent users on a self-hosted 3-machine cluster, validating the microservice architecture under real concurrent load.

**Codesentry — AI-Generated Code Security Validation** GitHub — PyPI

- Cut per-commit security-review time to under 1 second by building and publishing codesentry, an open Python CLI tool validating AI-generated code against 18 security patterns across 7+ languages.
- Designed a global git pre-commit hook system with per-repo strict-mode overrides, auto-generating copy-paste LLM fix prompts for each detected issue.
- Shipped a companion VS Code extension (VibeGuard) upgrading inline scanning to full Python AST-based analysis.

## Certifications

- Oracle Cloud Infrastructure 2025 Certified DevOps Professional
- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional
- Oracle Data Platform 2025 Certified Foundations Associate
- Additional: GUVI Oracle SQL, GeeksforGeeks Full Stack Development, Infosys AI Foundation, Anthropic AI Fluency

## Achievements

- Winner – College Ideathon (Team Leader):** Led a team of 4 members to secure 1st place by proposing an AI-driven solution, coordinating ideation, presentation, and technical planning.
- Master of Ceremonies (MC), College Club:** Hosted and coordinated technical and cultural events with audiences of 300+ students, managing stage flow and speaker engagement.
